

Predictive Phase

[Zero-Shot Track](#) [Supervised Track](#)

Zero-Shot Track

Predict PETase variant properties without training data.

Download

Predictive PET Zero-Shot Test Data 2025

Dataset Information

PETase variant sequences to predict on for zero-shot track evaluation.

 File CSV Download

PETase variant sequences for zero-shot track prediction tasks

Size: 1.24 MB

Additional Files

Expression vector used to clone and express PETase sequences.

- The insert region where PETase coding DNA sequences (CDS) were cloned is annotated in the GenBank file. Download

- Amino acid (AA) and corresponding coding DNA sequences (CDS) for Wt genes. Download

- Experimental methods for expression, and activity measurement. Download
